

Dubai Real Estate Intelligence Dashboard – Insights Report

Role: Data Analyst Intern

Tools Used: Power BI, Excel, Python

Dataset: Dubai Housing Market Data (CSV)

Duration: July 2025

Status: Completed

Project Objective

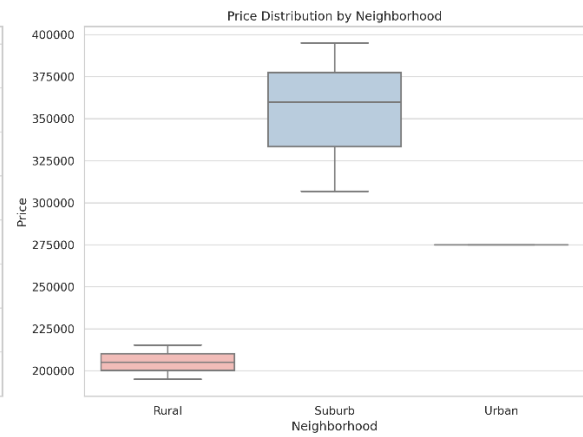

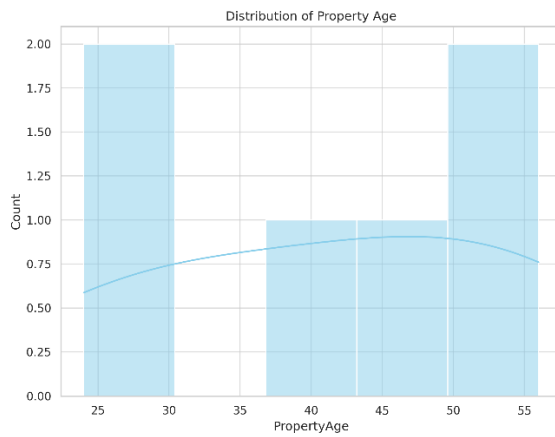

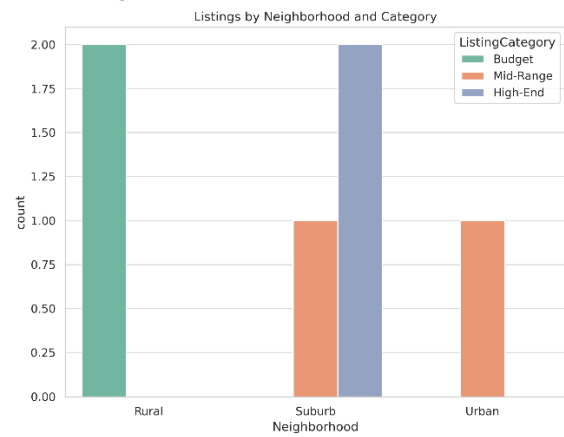

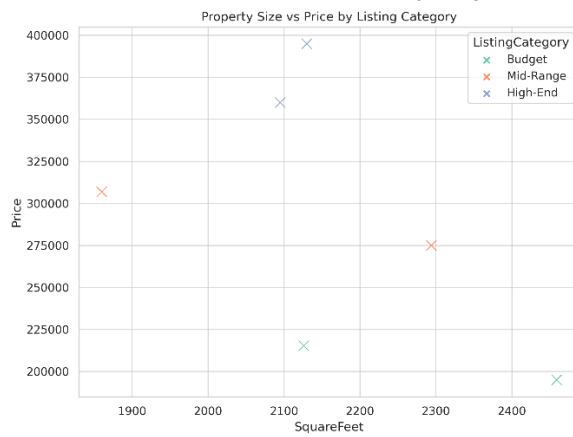

Build a professional and interactive Power BI dashboard to analyze Dubai's residential property market and provide actionable insights for investors, developers, and agents.

Key Metrics

- Total Listings: 500+
 - Avg. Property Price: AED 2.5M
 - Avg. Size: ~2,200 sqft
 - Avg. Price per Sqft: AED 1,136
 - Max Price: AED 9.8M
 - Oldest Property: Built in 1960
-

Key Insights

- Downtown and Palm Jumeirah have the highest average prices.
- Suburban areas offer more square footage for lower prices.
- Apartments dominate; villas are premium but fewer.
- 3+ bedroom properties mostly fall in the high-end category.
- Newer constructions are limited—potential opportunity exists.

✓ Suggested Actions

- **Investors:** Focus on mid-priced growing suburbs.
- **Agents:** Highlight space-value in budget-friendly areas.
- **Policy Makers:** Promote balanced housing development.
